

LOS ANGELES COUNTY EMERGENCY MEDICAL SERVICES AGENCY

COURSE EVALUATION SUMMARY

PREHOSPITAL CARE: THE ISRAEL EXPERIENCE WITH TERRORISM

FEBRUARY 28, 2005

Total Participants = 40

Instructor Evaluation:

Name of Instructor(s): _____

Circle the number that best represents your opinion

Evaluation Factor	Strongly Agree	Agree	Disagree	Strongly Disagree
The information was presented in a clear and understandable manner	4 21 (53%)	3 17 (43%)	2	1 2 (5%)
The instructor demonstrated a strong working knowledge of the material	4 34 (85%)	3 6 (17%)	2	1
The instructor maintained a professional environment	4 32 (80%)	3 7 (18%)	2 1 (3%)	1
The instructor was effective and facilitated my learning experience	4 25 (63%)	3 14 (35%)	2 1 (3%)	1

Course Evaluation:

Circle the number that best represents your opinion

Evaluation Factor	Strongly Agree	Agree	Disagree	Strongly Disagree
This course met the stated objectives	4 25 (63%)	3 13 (33%)	2 2 (5%)	1
This course was relevant and met my professional needs	4 22 (56%)	3 18 (46%)	2	1
The handouts and/or audiovisual aids were appropriate	4 20 (50%)	3 15 (38%)	2 2 (5%)	1 3 (8%)
The teaching method(s) were appropriate	4 25 (63%)	3 10 (25%)	2 5 (13%)	1
The facility, space lighting and acoustics were adequate	4 28 (70%)	3 10 (25%)	2 1 (3%)	1 1 (3%)

List two things that you have learned in this course:

(SAMPLE, actual evaluation requires all comments to be listed)

- Delay in triage and transport to hospital actually increases fatalities despite prehospital medical interventions including tubes & IVs
- Control of massive bleeding from GSW using Elastic adhesive
- Rapid transport may benefit the patient more than remaining on the scene to stabilize
- New ways to control bleeding (ELAD dressing)
- Value of load and go criteria

Please identify the strengths of this course:

(SAMPLE, actual evaluation requires all comments to be listed)

- Instructors experience in current terrorist activities increases my awareness of international differences & similarities
- Strong images & real life experiences from speaker
- Visual aids strengthened the presentation and the follow up on the victims supported the beliefs of the instructor
- Speaks from first hand experience in what works and what does not. Offers personal recommendations to consider
- Showed research in other regions regarding trauma and pre-hospital care. Opened my eyes to other possibilities

Recommendations for improvement of this course:

(SAMPLE, actual evaluation requires all comments to be listed)

- Use of lapel mike and laser pointer
- Very hard to read, too much info on slides – poor color choice
- Instructor was not familiar with local treatment skills, spent too much time discussing bandage product and did not follow what I thought the lecture subject matter was going to be.
- Minimal time spent on terrorism - Far too much time spent on different types of bandaging

Additional comments:

None were provided
